## DAY 2

### ARUSHA TO TARANGIRE NATIONAL PARK

- Early morning you will be picked up at your accommodation by your private guide and we depart to Tarangire National Park. The Park is named after the Tarangire River which runs through it. This 'river of warthogs' is the only source of water for wildlife in the region during the dry season. In places, the vegetation is quite dense, including elephant grass, acacia woodlands and lush groundwater forest. The Park is well known for its elephant families, which can often be seen congregating by the river. You may also see giraffe, bushbuck and hartebeest. These animals are closely followed by a range of predators, including lions and leopards. There are more breeding species of birds found in Tarangire National Park than anywhere else on the planet! After Lunch and an extensive game drive, we head for our comfort partner lodges in Karatu for dinner and overnight.

- Accommodation Lake Burunge Baobab Tented Lodge  
Breakfast, Lunch & Dinner

Amman, Jordan  
Dabouq – Yathrub Street.

# Travel ITINERARY

## DAY 3

### LAKE MANYARA NATIONAL PARK

- Early morning after breakfast, we depart to Lake Manyara National Park which is an unspoilt paradise and is best known for its abundance of birds and tree-climbing lions. The dramatic western escarpment of the Rift Valley forms the Park's western border. To the east is the shallow, alkaline Lake Manyara. The lake covers a large area of the park, flooding and drying with the seasons and is home to thousands of flamingos during the rains. The name Manyara comes from the Maasai word 'emanyara', a popular plant which is used to build the protective enclosure around a family homestead (boma). The Park's vegetation is diverse, ranging from savannah to evergreen forest. On your exploration of the park you may see giraffe, zebra, wildebeest, buffalo, and elephant and if you are lucky; lions lounging in the trees. After Lunch and an extensive game drive, we head for our Mid-range Lodge for dinner and overnight.

- Accommodation Eileen's Trees Inn Lodge  
Breakfast, Lunch & Dinner

# Travel ITINERARY

## DAY 4 SERENGETI NATIONAL PARK

- Early morning after breakfast, we depart to Serengeti National Park. The Serengeti is truly spectacular. It is famous for its vast open grasslands which allow for excellent sightings of wildlife. The Serengeti is Tanzania's oldest National Park and it is also one of the oldest ecosystems on earth. Its climate and vegetation have remained largely untouched for millions of years. Whilst the Serengeti boasts abundant wildlife, it is perhaps best known for the annual Great Migration. Vast numbers of wildebeest; accompanied by large numbers of zebra and antelope move in an annual pattern, constantly seeking fresh grazing. The precise timing of the Migration is entirely dependent upon the rainfall patterns each year. After Lunch and an extensive game drive, we head for our tented partner lodges for dinner and overnight.

- Accommodation      Embalakai Serengeti Camp  
Breakfast, Lunch & Dinner

# Travel ITINERARY

## DAY 5

### CENTRAL SERENGETI NATIONAL PARK

- After an early breakfast at your accommodation, you will head for another game drive in the Serengeti National Park. The Seronera Valley offers lots of wildlife throughout the year including carnivores like hyenas, Lions, leopards and cheetah can often be found on and around these large rocky outcrops, as they offer a great vantage point to look over the plains in search of any prey, as well as ungulates including buffaloes, giraffes, hippopotami, impalas, topi, warthogs and zebras. You will have dinner and overnight at our carefully chosen tented camp.

- Accommodation      Embalakai Serengeti Camp  
Breakfast, Lunch & Dinner

## DAY 6

### SERENGETI NATIONAL PARK TO NGORONGORO CRATER

Early morning after breakfast, we continue with our en-route drive inside the Serengeti National Park before we depart to Ngorongoro crater. When you first see Ngorongoro Crater, it looks like a forgotten world. Concealed by the steep volcanic walls is a pristine wilderness including sweeping savannah, pockets of acacia woodland and glistening lakes and swamps. The Crater was created when a large volcano exploded and collapsed in on itself two to three million years ago. It is famous for both its geological delights and for being a natural reserve which is home to some of the densest large mammal populations in the whole of the African continent. The drive down into the Crater is an adventure in itself and when you reach the Crater floor, you quickly find yourself amongst large numbers of wildebeest, zebra, gazelle, and more than 500 bird species. The Crater provides you with the best chance of seeing the endangered black rhino, which can sometimes be spotted in the open grasslands.
